BENEFICIOS

Los paneles decorativos perforados son utilizados para mejorar los espacios exteriores e interiores dando sentido al término “forma y función”, ya que proporcionan a los clientes belleza decorativa y al mismo tiempo sirven propósitos prácticos como el control de luz solar y seguridad. Podemos fabricar las celosías en diversos metales como son acero negro, acero inoxidable y aluminio.

Los paneles metálicos perforados crean una tendencia en Arquitectura Minimalista y Vanguardista y están siendo utilizados para crear espacios únicos. Su uso es residencial y comercial y se pueden fabricar a la medida, con o sin pintura y ser enviados a cualquier parte del país.

- Las fachadas metálicas en lamina perforada son elaboradas con la mejor tecnología de punzulado computarizado.
- Laminas Cold Rolled, Galvanizada, Acero Inoxidable, Aluminio.
- Dimensiones estándar en paneles(2 mt x 1 mt - 2.40 mt x 1.20 mt)
- Calibres de 0.45 mm, 1 mm, 1.5 mm, 2.mm, 2.5 mm, 3 mm.
- Acabado arquitectónico.
- Pintura electrostática de alta calidad.
